OUR GRADUATES

In thirteen previous FrauenLoop learning cycles, we've trained a broad range of women to apply different technical skills.

Our graduates are uniquely suited for work in the tech industry, not just because of their programming ability, but due to their perseverance, problem-solving, and familiarity with agile teamwork. Like our mentors, FrauenLoop students come from diverse backgrounds and take different paths into the tech industry. The graduates below represent a cross-section of the women with whom FrauenLoop has worked.
